LWU-3015

Ultra Sonic Welding Machine

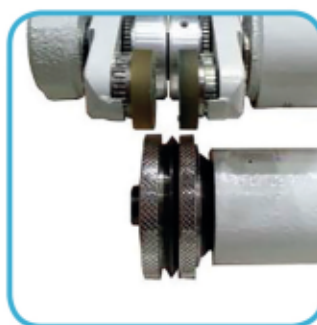

JEUX

The **LWU-3015** is a unique ultrasonic welding solution with both cylinder and post bed arms as standard. The easy changeover of arms means this machine can be used in for a variety of different applications. The material transport system behind the ultrasonic horn allows for consistent and even feeding resulting in high quality seams every time.

■ Key Features

- Even material feeding
- Cylinder bed change over
- Post bed change over
- Easy peddle operation

|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Model name | LWU-3015-4BT |
| Power Required | 1P 200V 50/60Hz |
| Power Consumption | 1.0kva |
| Power Out-Put | Max 600W |
| Oscillating Frequency | 30KHz |
| Feed Speed | 0-8.0m/min (minimum 0.1m/min) |
| Motor | 2 Stepping Motors |
| Presser | Air Cylinder |
| Others | PLC Control / LCD Touch Panel / Control Horn Cooling Device / Air Pressure Detector / Welding Roller Cooling & Blowing Device Touch sensor |

*air compressor is required
