

# JEUX-US-501

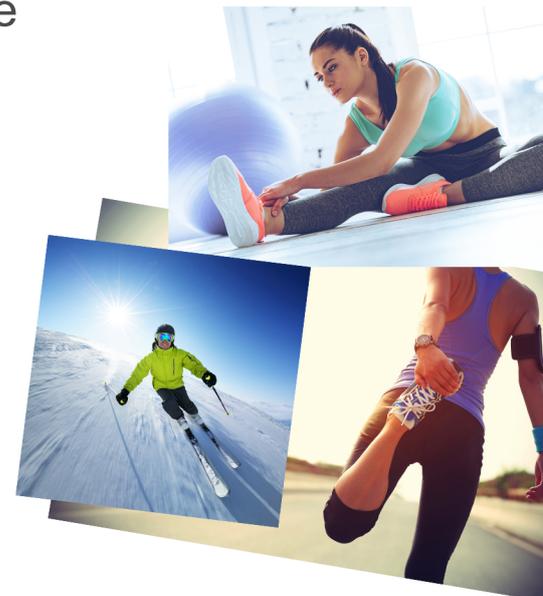

Ultrasonic Bonding Machine

The JEUX-US-501 uses state of the art ultrasonic technology to weld fabric together. The resulting seams are what is called “micro-seams” as they take up a miniscule area. This type of seam can differentiate you from your competitors and give you the competitive edge for your designs.

Key machine features include:

- Ultrasonic System Status Indication
- Innovative Auto Cutter Calibration
- Extremely Narrow Seam Allowance
- Fabric Thickness Selection
- 40 kHz Quiet Operation
- Pattern Cutting Mode
- Power Monitoring

## APPLICATIONS
